Friability Testers

Description

Tablet Friability Testers of the FT Series comply 100% with a USP/EP requirements.

The CALEVA FT series come with a routine for emptying the drum automatically, without removing the drum from the unit.

The run-time can be adjusted by membrane keys in either time or number of total revolutions. The remaining runtime as well as the actual rotation speed are shown at 2 LE displays.

To comply with the latest specifications the unit is equipped with one additional switching leg (10° position).

CALEVA Friability Testers are available for holding one (FT 15) or two (FT 25) drum/s.
