**SDT – Basic Disintegration Tester**

## **Description**

The SDT is a basic disintegration tester for suppositories and vaginal ovulus which complies latest specifications (EP).

The 3 test-stations are located in a 12 liter water bath which is heated by an electronic immersion thermostat (accuracy  $\pm 1^{\circ}\text{C}$ ).

A timer reminds the user to turn the test-stations very 10 minutes on  $180^{\circ}$ .

For cleaning purpose the acrylic glass rack with the 3 test-stations can be easily removed from the water bath.

## **Features**

- 3 test stations, revolvable
- 6 stainless steel test-station covers
- Acrylic glass water bath with fillin mark
- Immersion thermostat with circulation pump
- Timer with acoustic reminder function

## **Options**

- Spare test-station covers
- IQ/OQ handbook
